Abstract

The environment is one of the most important issues that raise great interest at the global and national level and it has been necessary for man to preserve it and protect it from all what may damage it. The world has witnessed a serious environmental degradation resulting in the destruction of many organisms and all of this is caused by the human race itself, and that through his ignorance and overriding the risks and the damages resulted from it. In addition to the fact that the public health institutions contribute to the environmental impact resulting from the activities carried out by these institution. Most of the countries in the world are currently suffering from various environmental problems, including pollution through medical waste. And Algeria as well as other countries which has been affected by environmental damage, and has made several efforts to preserve the environment has developed policies for the management of public institution in the field of environmental protection.

key worlds :The environment : - pollution -medical waste - environmental protection.
