# Table of Contents

List of Figures .....	i
List of Tables.....	iii
List of Abbreviations .....	iv
INTRODUCTION .....	1
LITERATURE REVIEW .....	2
<b>CHAPTER I PHARMACOKINETICS AND MODELLING .....</b>	<b>3</b>
1. Pharmacokinetic parameters .....	3
1.1 Expressions and parameters for ADME .....	5
-Effective Dose.....	5
-Rate of Drug Absorption .....	6
-Rate of Drug Distribution.....	6
-Rate of Drug Elimination .....	6
2. Pharmacokinetic modelling .....	7
2.1 Compartmental model .....	8
2.2 Physiologically based pharmacokinetic model .....	8
3. Mathematical approaches .....	10
<b>CHAPTER II SIMULATION TOOLS .....</b>	<b>12</b>
1. Enhancing Drug Development with PBPK Modeling: Predictive Capabilities and Applications.....	12
2. In silico resources available to assist in PBPK model construction and evaluation .....	16
2.1 Resources for external exposure .....	16
2.2 Resources for obtaining physico-chemical properties .....	17
2.3 Resources for obtaining ADME-related information .....	17
2.4 Resources for physiological and anatomical reference values .....	20
2.5 Physiologically-based kinetic modelling software .....	20
2.6 Software to assist development of pharmacokinetic/pharmacodynamic models .....	21
2.7 Software to identify structurally similar chemicals .....	21
<b>CHAPTER III GASTROPLUS: A CLOSER LOOK .....</b>	<b>23</b>
1. What is GastroPlus .....	23
1.1 Absorption – An Important Distinction .....	23
1.2 Pharmacokinetics in GastroPlus.....	24

<b>2. How GastroPlus can be used in drug discovery .....</b>	<b>26</b>
<b>2.1 Predicting percent absorbed .....</b>	<b>27</b>
<b>2.2 Parameter Sensitivity Analysis (PSA) .....</b>	<b>27</b>
<b>2.3 General model building .....</b>	<b>28</b>
<b>3. How GastroPlus can be used in drug development .....</b>	<b>28</b>
<b>3.1 Drug-specific model building .....</b>	<b>28</b>
<b>3.2 Dosage formulation evaluation and design .....</b>	<b>29</b>
<b>3.3 Controlled release evaluation and design .....</b>	<b>29</b>
<b>3.4 Pharmacokinetic studies .....</b>	<b>29</b>
<b>3.5 Parameter Sensitivity Analysis .....</b>	<b>29</b>
<b>3.6 Population Simulator .....</b>	<b>29</b>
<b>3.7 Drug metabolism and nonlinear dose-PK response .....</b>	<b>30</b>
<b>3.8 Pharmacodynamic simulations .....</b>	<b>30</b>
<b>4. Key Components of GastroPlus Software .....</b>	<b>30</b>
<b>4.1 Compound tab .....</b>	<b>30</b>
<b>4.3 Pharmacokinetics tab.....</b>	<b>31</b>
<b>4.4 Simulation tab.....</b>	<b>31</b>
<b>CHAPTER IV TOXICOKINETICS AND PHYTOCHEMICALS.....</b>	<b>32</b>
<b>1. Toxicokinetics: pharmacokinetics in toxicology .....</b>	<b>32</b>
<b>1.1 Technical differences between pharmacokinetics and toxicokinetics .....</b>	<b>32</b>
<b>1.1.1 Solubility.....</b>	<b>32</b>
<b>1.1.2 Absorption.....</b>	<b>32</b>
<b>1.1.3 First-Pass effect or Pre-systemic clearance .....</b>	<b>33</b>
<b>1.1.4 Protein Binding.....</b>	<b>33</b>
<b>1.1.5 Metabolism.....</b>	<b>33</b>
<b>1.1.6 Renal Excretion .....</b>	<b>33</b>
<b>1.1.7 Physiological Feedback .....</b>	<b>33</b>
<b>1.1.8 Drug Interactions.....</b>	<b>34</b>
<b>1.2 Toxicokinetic modelling.....</b>	<b>34</b>
<b>1.3 Available software to build physiologically based toxicokinetics models .....</b>	<b>34</b>
<b>2. Toxic plants in folklore medicine .....</b>	<b>34</b>
<b>2.1 Common toxic plants in folk medicine .....</b>	<b>35</b>
<b>CHAPTER V ATRACTYLIS GUMMIFERA L AND ATRACTYLOSIDE .....</b>	<b>36</b>
<b>1. Atractylis gummifera L.: An Overview .....</b>	<b>36</b>
<b>1.1 Description .....</b>	<b>36</b>

1.2 Uses and ethnopharmacology .....	37
1.3 Phytochemistry .....	37
<b>2. Toxicity of atractyloside .....</b>	<b>38</b>
2.1 Mechanism of toxicity .....	38
2.2 Toxic effects and symptoms.....	39
2.3 Toxic doses .....	39
2.4 Structure-Activity Relationship (SAR) .....	40
2.5 Analytical toxicology .....	41
<b>3. Reported cases of Atractylis gummifera L poisoning.....</b>	<b>41</b>
<b>4. Treatment .....</b>	<b>42</b>
<b>PRACTICAL STUDY .....</b>	<b>43</b>
<b>PRACTICAL STUDY OBJECTIVES .....</b>	<b>44</b>
<b>CHAPTER I MATERIALS AND METHODS.....</b>	<b>46</b>
<b>I. Materials .....</b>	<b>46</b>
1. Hardware .....	46
2. Software.....	46
2.1 GastroPlus™ Software Suite (Simulations Plus).....	46
2.2 ADMET Predictor® .....	47
2.3 MedChem Designer™ .....	47
2.4 Excel.....	47
3. Database .....	47
3.1 PubChem .....	47
<b>II. Methods .....</b>	<b>48</b>
1. Obtaining a Simulation Plus academic trial for non-commercial use: .....	48
2. Obtaining the molecular structure file for our molecules .....	50
3. Running GastroPlus simulations .....	52
3.1 Creating a new drug database and importing the molecule into the GastroPlus software suite .....	52
3.2 Refining and optimizing the physicochemical properties:.....	54
3.3 Dose Selection Considerations.....	55
3.4 Gut Physiology tab parameters .....	56
3.5 Pharmacokinetics tab parameters .....	57

## Title: Applications of GastroPlus® Software in Toxicokinetic Studies:

### A Case Study on Atractyloside

A thesis submitted in partial fulfillment of the requirements for the degree of Doctor of Pharmacy

#### Abstract

This study aims to predict the toxicokinetics of atractyloside, the principal toxic compound found in *Atractylis gummifera*, utilizing GastroPlus software. Key parameters such as maximum concentration (Cmax), half-life (t<sub>1/2</sub>), area under the curve (AUC), and bioavailability (F) were determined. These findings have significant implications for enhancing the management and treatment of *Atractylis gummifera* poisoning cases.

**Keywords:** GastroPlus, toxicokinetics, atractyloside, *Atractylis gummifera*.

#### Résumé

Cette étude vise à prédire la toxicocinétique de l'atractyloside, le principal composé toxique trouvé dans *Atractylis gummifera*, en utilisant le logiciel GastroPlus. Des paramètres clés comme la concentration maximale (Cmax), la demi-vie (t<sub>1/2</sub>), l'aire sous la courbe (AUC) et la biodisponibilité (F) ont été déterminés. Ces résultats ont des implications importantes pour améliorer la gestion et le traitement des cas d'intoxication par *Atractylis gummifera*.

**Mots-clés :** GastroPlus, toxicocinétique, atractyloside, *Atractylis gummifera*.

#### الملخص

تهدف هذه الدراسة إلى التنبؤ بالسميات الحيوية للأتركتيلوسيد، المركب السام الرئيسي الموجود في نبات الأتركتيليس غميفيرا، باستخدام برنامج GastroPlus. تم تحديد المعلمات الرئيسية مثل التركيز الأقصى (Cmax)، ونصف العمر (t<sub>1/2</sub>)، والمساحة تحت المنحنى (AUC) ، والتوافر البيولوجي (F). تحمل هذه النتائج تبعات هامة لتعزيز إدارة وعلاج حالات التسمم بنبات الأتركتيليس غميفيرا.

**الكلمات الدالة:** GastroPlus، السميات الحيوية، الأتركتيلوسيد، الأتركتيليس غميفيرا.
